Monsters

What are the most common monster types (shown as race in this data)?

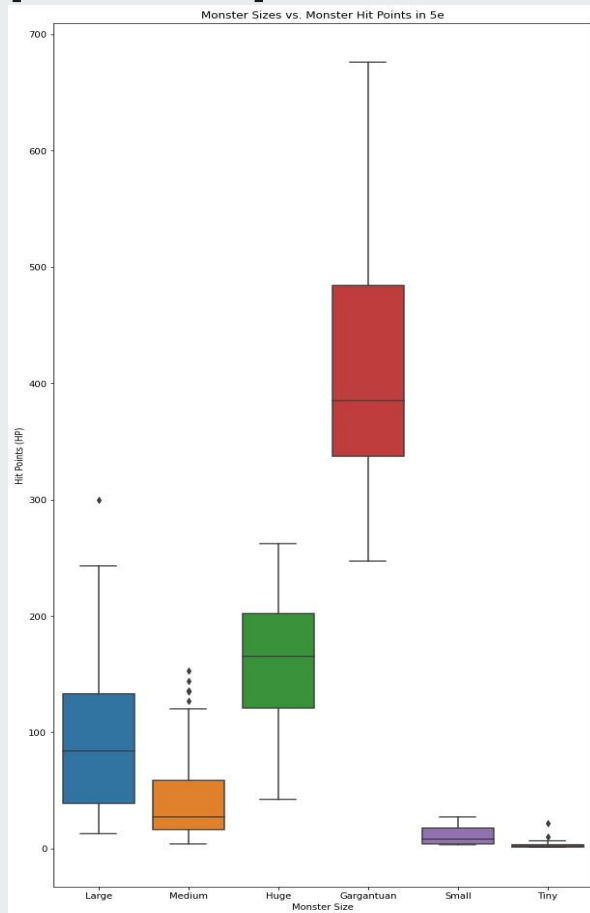

What does the spread of alignment look like for an individual monster race?

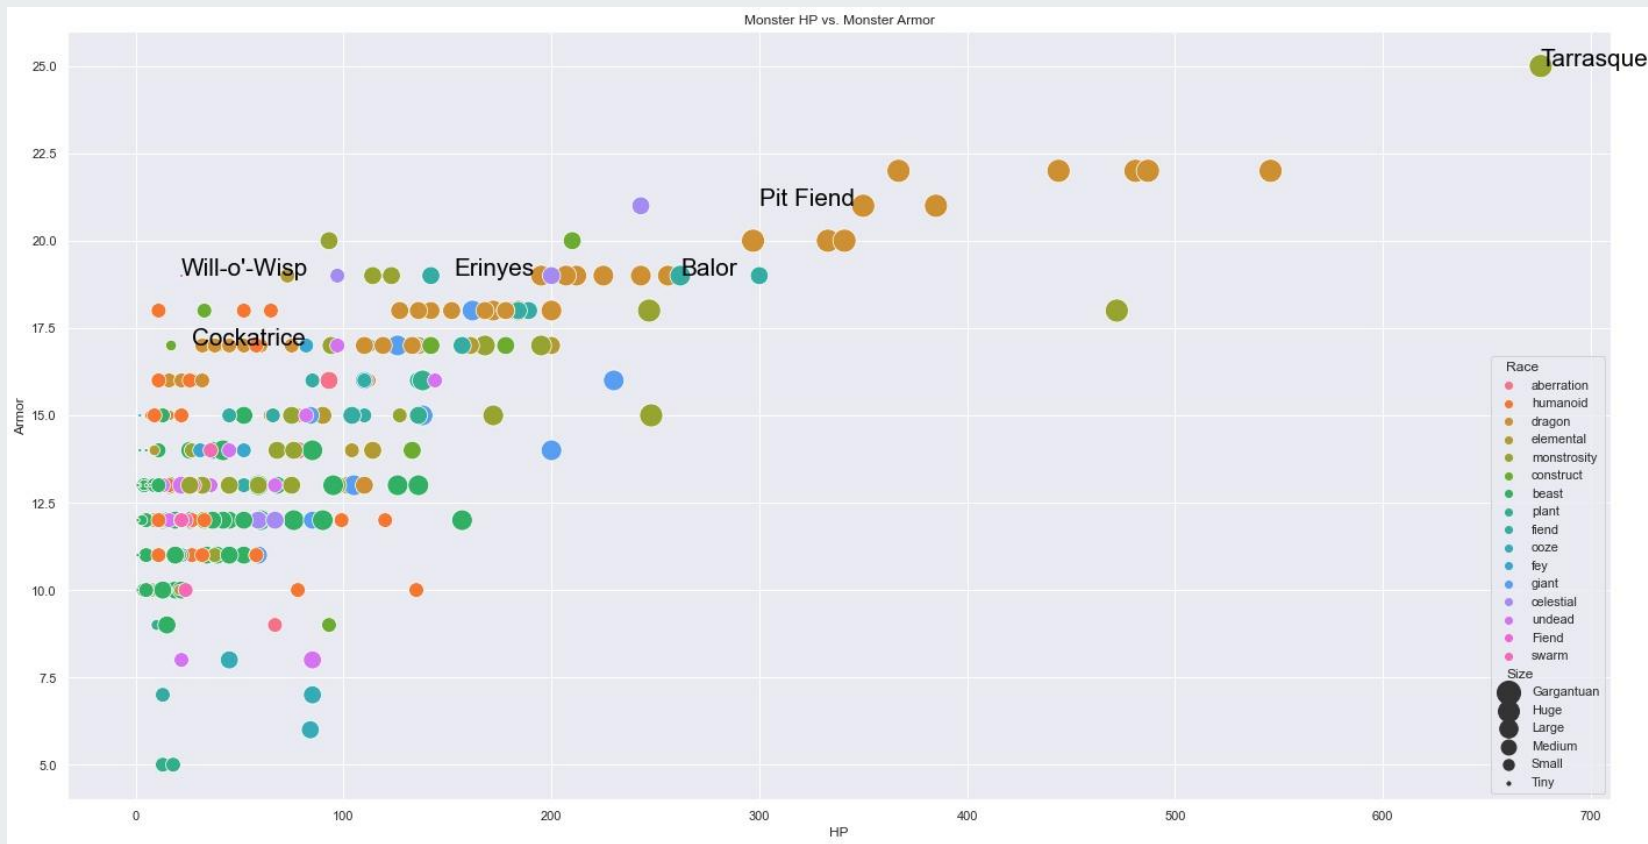

Does monster size impact hit point amounts?

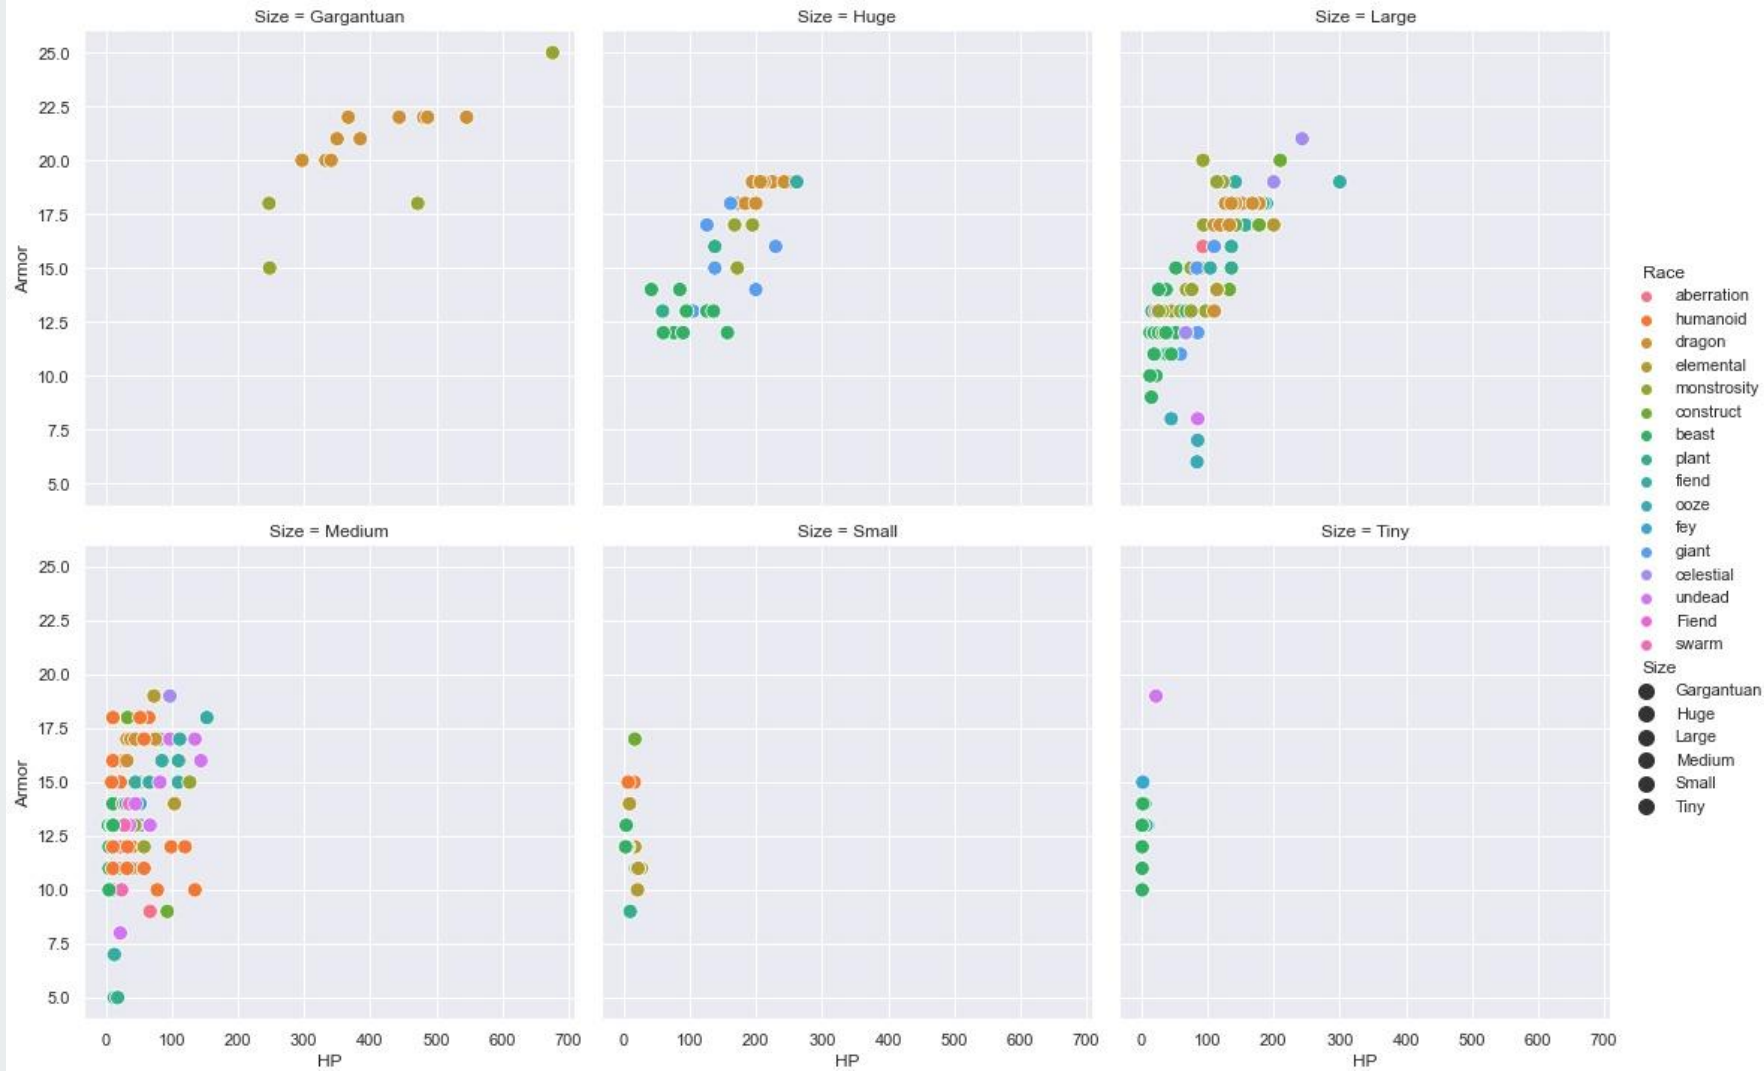

Big bodies bring big health pools

Does a monster's armor class have a correlation with its hit points?

Recommendations

Racial Equity

Create more official monsters from other races.

Alignment

Not everyone in the world is evil, even if they are a monster.

Dramatic HP vs. Armor Variance

Shake up the dichotomy of big baddie equals big health pool

Diversify your portfolio!!!
